

Initial user registration.

When you first use the Viso clinician dashboard, you will

need to sign in. The nominated lead user should create a user

profile for you which will generate an e-mail verification

link.

When you click the link, a verification code is sent to

your mobile phone and you are taken to the verification

screen.

Fill in the verification code that you received on your phone

to continue.

If this does not work, try asking the nominated lead to

resend your verification link or contact Viso customer service.

Once you have signed up, you will be asked to set a password.

Passwords need to contain a mixture of letters, numbers and

special characters.

The verification will then be completed and you will be able

to access your account at anytime.

If you wish to edit your own user profile, this can be done

in the my profile window which you can get to by clicking on

the "Settings" button in the sub menu.

For more information on managing users once setup is available,

watch the "Managing users in the Viso platform" video.
